

Jianli Zhao
zhao78740@gmail.com
gentlyzhao.github.io/

Education

09 2026
–09 2028 **Erasmus Mundus Joint Master**, Data Engineering and Artificial Intelligence
 Full Scholarship

09 2021
–06 2025 **B.Sc.** Computer Science, Shandong University (a joint program with ANU)
 GPA: 88.07/100 · Rank: 7/102

Research Interests

Natural Language Processing, AI Safety, Trustworthy LLMs, Interpretability and Alignment

Research Experience

04 2025
–now Remote Research Intern, Martin AIGI, **Oxford** (Advisor: [Prof. Fazl Barez](#))

07 2024
–10 2024 Onsite Research Intern, Jmcauley Lab, **UCSD** (Advisor: [Prof. Julian McAuley](#))

12 2022
–07 2024 Research Assistant, SDU nlp Lab, **Shandong University** (Advisor: [Prof. Bin Jiang](#))

Industry Experience

06 2026
–09 2026 **Ant Group**, Intern
 Investigated intrinsic model safety for banking and financial applications, focusing
 on safety capabilities embedded within the model.

04 2026
–06 2026 **StepFun**, Foundation Model Intern
 Contributed to foundation model pretraining and multimodal data processing to
 support model training.

Publications

 [Google Scholar](#)

[C1] **Chain-of-Thought Hijacking**

Jianli Zhao, Tingchen Fu, Rylan Schaeffer, Mrinank Sharma, and Fazl Barez

Under Review NeurIPS 2026: Ratings 444

[LLM Safety](#) · [Jailbreaking](#) · [Mechanistic Interpretability](#)

Induces excessively long chain-of-thought in reasoning models to weaken refusals, investigating the underlying mechanism through activation probing and causal interventions.

[C2] **IPED: An Implicit Perspective for Relational Triple Extraction based on Diffusion Model**

Jianli Zhao, Changhao Xu, and Bin Jiang

NAACL 2024 Main Conference paper

[Information Extraction](#) · [Diffusion Models](#)

Formulates joint entity and relation extraction as iterative denoising of implicit block representations.
